How to hide your Django secret key.

1. Install a python package (decouple). Go to your terminal, type in the command(pip install python-decouple)

2. In your settings.py import decouple (from decouple import config)

3. Copy your secret key and Debug= "True" to your env file.

4. Replace your secret key in settings.py with SECRET_KEY = Config('SECRET_KEY) And DEBUG = Config('DEBUG', cast = bool) True.

N.B cast = bool. Changes a string to boolean.
